EPIRB MT400 digital	Stainless Steel Seat Frames & Swivel
Fire Extinguisher 1kg	Transom U Bolts
Foam filled hull	Walk Through Transom Door
Forward Access Hatch	Windscreen Rail

The new Explorer 595 establishes a new bench mark for family fishing and cruising. The famed Cruise Craft Explorer range now boasts a completely new 595 model which is conveniently positioned between the well established and highly rated Explorer 575 and Explorer 625 models.

The Explorer 595 is the boat that has been built for the hard core recreational fishermen who head way offshore to the deep blue waters where game fish run.

In creating the Explorer 595, the Cruise Craft design team has crafted a fresh new generation of hull design from the keel up. The bow is deeper and the bow section has additional flare to make your boating softer and dryer. Whilst the proven Cruise Craft hull geometry continues, the Explorer 595 has a host of new features included.

A new sleek deck profile has been created and tooled. This incorporates a recessed toe rail for safe access to the bow. Inside the cockpit there is a full length patterned fibreglass floor liner that extends up the sides to just under the gunwale, new style bucket seats with revised upholstery design, a modular dash panel which accommodates large scale electronics and a rear underfloor storage tank.

For those boaters who demand a few options to personalise their Explorer, you can specify the stainless steel Targa rocket launcher with bimini and clears. Or why not consider the all new design folding Targa, an absolute work of art. Customers can also now include an optional opaque acrylic lockable sliding cabin door to make your boat secure.

Family boating and family blue water fishing has never been better with the expansive range of Cruise Craft Explorers. Now boaters have an even bigger selection of models with the release of the all new mid range Explorer 595.
